

# Transferring / Dosing / Seeding SCC Single Charge Container

- SCC combined with PTS Powder Transfer System® for safe reactor charging or any other powder conveying application
- Ideal for the introduction of small quantities of catalysts, additives, etc.
- High containment - no opening during the process
- No risk of contamination
- Oxygen exclusion by PTS
- Process isolation, safe charging independent of reactor conditions
- 100 % discharge due to PTS suction
- Typical size of volume 1 - 10 l
- CIP
