

From a single item to a shippable pallet Case Serialization Units

At Dec, we strive to develop innovative, customized solutions for packaging processes in the Life Science industries. We aim to guide our clients through each level of the serialization process, from a single item to shippable pallets. The Dec Serialisation equipment solutions are designed to simplify the packaging process.

Our Serialization equipment solutions are compatible with all high-tech production facilities and software processes known in the pharmaceutical packaging industry. All standard units can be customized according to the unique requirements and specifications of every individual customer.
